[This is a link][https://link.com]

##Syntax for inserting links in github issue.

****This is bold**** - Syntax for bold text.

- One can add labels to the issue and also assign to someone.
- Issue is open until it is resolved and is closed once it is resolved.
- Every issue has a unique id associated with it which is used while committing the changes.
- If "fixes" keyword is used in commit message, it closes the issues automatically.
- If the hash code of the commit is pasted in issue text, it resolves itself automatically into a link that is directed to that particular change.
