Intro to Git & GitHub

25 October 2022   09:50

Git -> "version control"
- Keeps track of the entire history of things that we are working on.
- Supports collaboration.

GitHub -> web service that runs Git behind.

"Repository" aka "Repo" -> kind of project.
- Consists of multiple files,
- README
- Can be Public or Private
- COMMIT
- COMMIT HASH - unique identifier for a particular commit.
